Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Excerpt from List of Congress on Water Rights and the Control of Waters The remarkable development of irrigation in the arid regions, and the no less remarkable development of water power applied to electric current generators, has aroused a very keen interest in sources of water supply. The use of water for these two important industrial purposes frequently interferes seriously with its natural flow and causes great loss to property largely dependent for its value upon the continuance of this natural flow. The discussion of the various claims put forth by these conflicting interests has produced an extensive literature. It is the purpose of this list to bring together the more important of these discussions, and to point out, by means of a comprehensive analytical index, where information on any phase of the subject, even the minutest, may be found. A subject of such widespread interest lends itself readily to cooperative treatment. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books.
