## NAKED ARCHITECTURE

Skira. Paperback. Book Condition: new. BRAND NEW, Naked Architecture, Valerio Paolo Mosco, Harry Francis Mallgrave, "Naked Architecture Valerio Paolo Mosco: An account of one of the most interesting phenomena of contemporary architecture: the return to the structure and methods with which contemporary constructions are realized. Over the last ten years architecture would seem to have rediscovered engineering. Now that the Postmodern period, in which the structure of buildings was camouflaged by coverings of every kind, has passed, architecture today seems to have undressed, almost as though wishing to show how it is made (and to render this spectacular). On the other hand, the rediscovery in recent years of plastic form has brought about a closer relationship between architects and engineers. In the wake of the phenomenon that is the work of Santiago Calatrava, figures of engineer-architects have emerged such as Cecil Balmond, Sasaki and Guy Nordenson, who have been able to give a strongly "engineering-oriented" guise to ever more complex building sites. To this we must add the rise of new issues, such as that of environmental engineering, which has changed from being a specifically technical sphere to one of many other realms of knowledge, not least the aesthetic. If, therefore, there is a phenomenon today that is able to hold together the various expressions of contemporary architecture, it is precisely this return to the structure and methods with which it is realized.
