

Spectral analysis method -Second Edition

By PAN TIE YING. ZHANG YU LAN. SU KE MAN

paperback. Book Condition: New. Ship out in 2 business day, And Fast shipping, Free Tracking number will be provided after the shipment.Pages Number: 274 Publisher: East China Polytechnic University Pub. Date :2009-7-1. MS. UV. IR and NMR spectroscopic methods such as structural identification of organic compounds is the most important method. widely used in organic synthesis. stone; by the chemical industry. biochemistry. pharmacology. pharmacology. toxicology. clinical medicine and other fields. Book is a comprehensive exposition of the MS. UV. IR. Raman spectroscopy and nuclear magnetic resonance spectroscopy in organic compounds and the basic principles of structural analysis applications. The book also incorporated into the spectral domain of the more mature and versatile new technologies. such as electrospray ionization mass spectrometry. 2D NMR. etc. and a selection of representative spectrogram. examples and exercises. and a large number of spectral data to enhance the reader with spectral methods to solve practical problems. Write this book seeks to avoid the tedious mathematical derivation. and focus on the identification of spectral methods in the structure and all kinds of useful spectral information (spectrogram) and the relationship between molecular structure. Therefore. user-friendly. with a strong practical are the main features of the book. This book...

Reviews

It is an awesome publication which i actually have ever read through. it had been writtern really properly and valuable. I found out this book from my i and dad recommended this pdf to discover. -- Doyle Schmeler

This book is definitely not simple to begin on studying but quite fun to see. I actually have read and that i am sure that i will gonna read through yet again once again in the foreseeable future. It is extremely difficult to leave it before concluding, once you begin to read the book.

-- Brennan Koelpin
